Education

University College London (UCL) BSc Data Science	Sep. 2025 – Jun. 2028 London, UK
– Achieved First Class in Year 1 (2025–2026).	
Undergraduate Preparatory Certificate for Science & Engineering (UPCSE) Mathematics & Biology track; A*A*A*A* (Overall 83%, Pass with Distinction), A-level equivalent	Sep. 2024 – Jun. 2025 London, UK
Dankook University High School Elected Class President (Grade 11)	Mar. 2016 – Feb. 2019 Seoul, South Korea

Experience

Sogang University, Department of Computer Science and Engineering Undergraduate AI Researcher (Network Laboratory, Prof. Sungwook Kim / 김승욱 교수)	Jun. 2026 – Oct. 2026 Seoul, South Korea
– Conducting research on game-theoretic modelling for strategic interaction, including incentive design and equilibrium analysis.	
Shin & Kim LLC (Law Firm) / 법무법인 세종 Summer Law Clerk	Jun. 2026 – Jul. 2026 Jongno-gu, Seoul, South Korea
– Conducted research on U.S., EU, and China AI sovereignty policies—spanning technology export controls, investment screening, and domestic AI regulation—and presented a research report to a senior intellectual property (IP) attorney ahead of his International Bar Association (IBA) panel.	
– Prepared a comparative analysis of AI regulatory frameworks across the EU (AI Act), U.S. (executive orders and sector-specific rules), and Korea (AI Basic Act).	
– Researched and outlined procedures for U.S. litigants seeking testimony from Korean entities under the HCCH 1970 Evidence Convention for the International Litigation Practice Group.	
– Completed attorney training on secured lending, cross-border loan considerations under Korean law (security interests, parallel debt, guarantees, and LBO/fiduciary-duty issues), and M&A practice.	
Republic of Korea Army (The 3rd Infantry Division) Sergeant – Electronic Surveillance Equipment Maintenance	Jan. 2022 – Jul. 2023 Cheorwon, Gangwon-do, South Korea
– Maintained and repaired electro-optical surveillance systems (TOD, NVG) and small arms (K2 rifles, K3 light machine guns), diagnosing faults to ensure operational readiness.	

Projects

Document Reader QA Bot (RAG) — IBM AI Engineering	2025
– Built a PDF-based QA assistant that returns retrieval-grounded summaries and answers.	
– Implemented an end-to-end RAG workflow (load → split → embed → index → retrieve → answer).	
– Improved answer reliability by grounding responses in retrieved passages rather than parametric memory alone.	
– Tech: Python, LangChain, ChromaDB, embedding models.	

Metro Network Simulation and Commuter Travel-Time Analysis — UCL	2025
– Built an object-oriented metro network simulator using weighted graph abstractions. – Computed shortest commuter routes and travel times, including transfer costs and network constraints. – Simulated disruption scenarios (e.g., station closures) and quantified changes in average journey time. – Designed extensible components to support additional behaviours and commuter-specific policies. – Tech: Python, OOP, graph algorithms, simulation modelling.	
Memory-Efficient Text Analysis (NLP Mini Project) — UCL	2025
– Designed a streaming text-processing pipeline to analyze large documents without full in-memory loading. – Implemented case-normalized word frequency analysis and long-tail term exploration via configurable thresholds. – Applied the pipeline to 19th-century literary texts sourced from Project Gutenberg. – Tech: Python, file I/O, basic NLP preprocessing.	
Mathematics Concept Book (School-use Publication)	2018
– Topics: Geometry & Vectors, Calculus, Probability & Statistics. – Led a student mathematics club as President to compile a concept book aligned with the high-school curriculum, with selected university-level extensions. – Edited and refined definitions and explanations through peer review to improve clarity and mathematical rigor. – Added multiple solution approaches per problem to compare methods and highlight efficiency and insight.	

Achievements and Responsibilities

Class President	Dankook High School
– Elected student representative (Grade 11).	
Founder & President, Advanced Mathematics Exploration Club	Dankook High School
– Created a mathematics workbook with club members, extending into university-level mathematics.	
Learning Plan Execution Award	Dankook High School
– Awarded among the entire student body (1,243 students) for outstanding self-management and consistency.	
Calculus Midterm Ranking	Dankook High School
– Placed 7th in Calculus among 350 science-track students.	
Perfect Attendance Award	Dankook High School
– Zero absences, tardies, or early departures across all three academic years.	

Certifications

Data Scientist — DataCamp Credential ID: DS0025311955456	Dec. 2025
IBM AI Engineering Professional Certificate — IBM Credential ID: GJX0P6WXOV3H	Dec. 2025
Microsoft AI & ML Engineering — Microsoft Credential ID: WPA328DIWV6V	Dec. 2025
Google Advanced Data Analytics — Google Credential ID: Q742HM3OENZ5	Dec. 2025
4th Dan Black Belt in Taekwondo — Kukkiwon Credential ID: 20248093	Feb. 2014

Skills

- **Languages:** Python, SQL, R
- **Tools:** Git, Jupyter, VS Code, MS Office
- **ML/Stats:** Machine Learning (Supervised/Unsupervised), Statistical Analysis, Regression, Predictive Modeling
- **Deep Learning Frameworks:** PyTorch, Keras, TensorFlow
- **LLM & RAG Frameworks:** Transformers, LangChain, ChromaDB
